FORCES ACADEMY
LEARNING MANAGEMENT SYSTEM

WEEK 01

PREPARED BY

Aleeha

Web Development Department · Full Stack Track

June 29 – July 3, 2026 | 10:00 AM – 4:00 PM

GitHub: github.com/Aleehaaa/-forces-academy-fullstack-codesaviours-si26-Aleeha

PROJECT OVERVIEW

This report summarizes Week 1 of the Forces Academy LMS Portal project, built as part of the Code Saviours SI-26 Full Stack Track. During this week, the project's MySQL database schema was designed and implemented, and the student registration and login authentication flow was built end-to-end using PHP and prepared statements.

ORGANIZATION	Code Saviours (SMC-Private) Limited
TRACK	Web Development – Full Stack Track
REPORTING PERIOD	June 29 – July 3, 2026 10:00 AM – 4:00 PM (weekdays)
REPOSITORY	github.com/Aleehaaa/-forces-academy-fullstack-codesaviours-si26-Aleeha

01 DATABASE ARCHITECTURE

The Forces Academy LMS database (`forces_academy_lms`) was created in phpMyAdmin with four core tables — `students`, `admins`, `courses`, and `notices` — each configured with a primary key, auto-increment identifiers, unique constraints where needed, and `CURRENT_TIMESTAMP` defaults to track record creation.

Database Structure

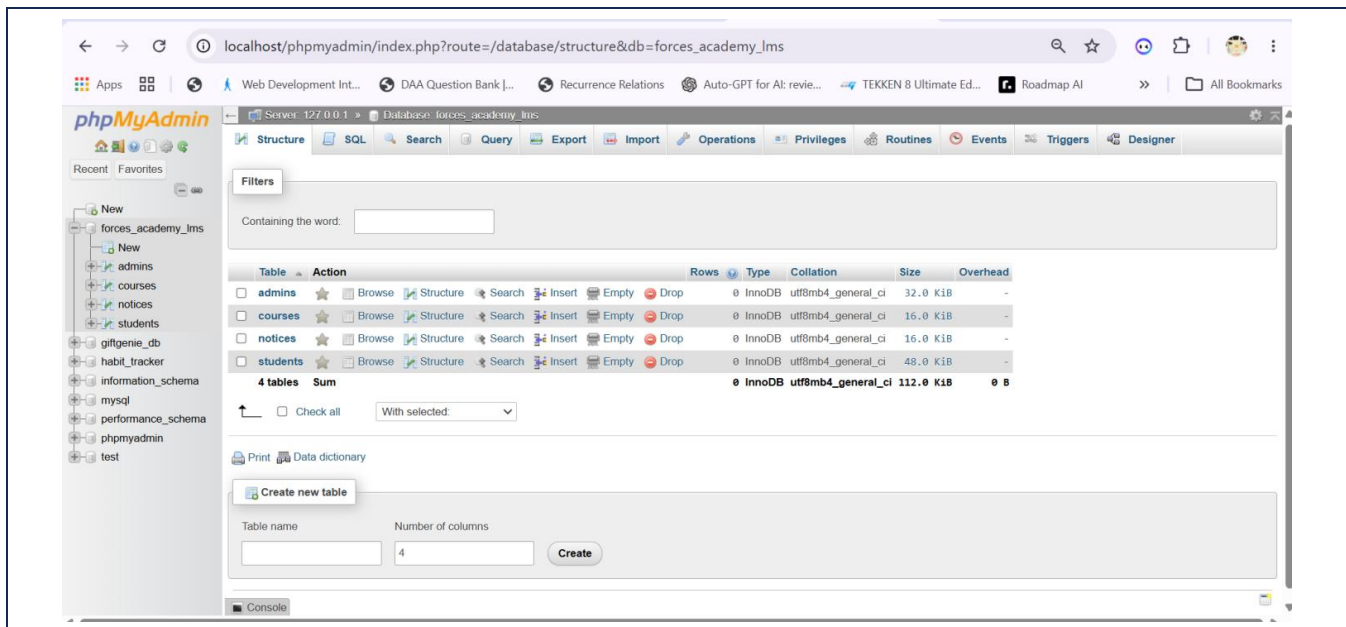

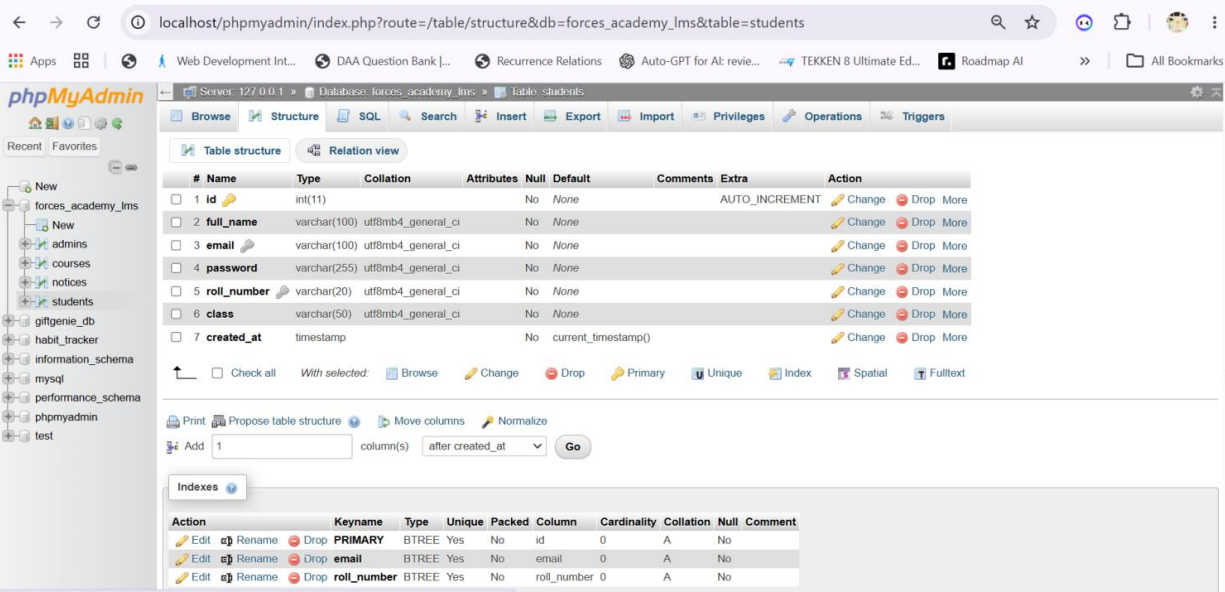

Fig. 1.1 — `forces_academy_lms` database structure, showing all four tables in phpMyAdmin

Students Table

Stores registered student records, including name, email, hashed password, roll number, and class, with a unique constraint on email to prevent duplicate registrations.

localhost/phpmyadmin/index.php?route=/table/structure&db=forces_academy_lms&table=students

Server: 127.0.0.1 Database: forces_academy_lms Table: students

Table structure

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	id	int(11)			No	None		AUTO_INCREMENT	Change Drop More
2	full_name	varchar(100)	utf8mb4_general_ci		No	None			Change Drop More
3	email	varchar(100)	utf8mb4_general_ci		No	None			Change Drop More
4	password	varchar(255)	utf8mb4_general_ci		No	None			Change Drop More
5	roll_number	varchar(20)	utf8mb4_general_ci		No	None			Change Drop More
6	class	varchar(50)	utf8mb4_general_ci		No	None			Change Drop More
7	created_at	timestamp			No	current_timestamp()			Change Drop More

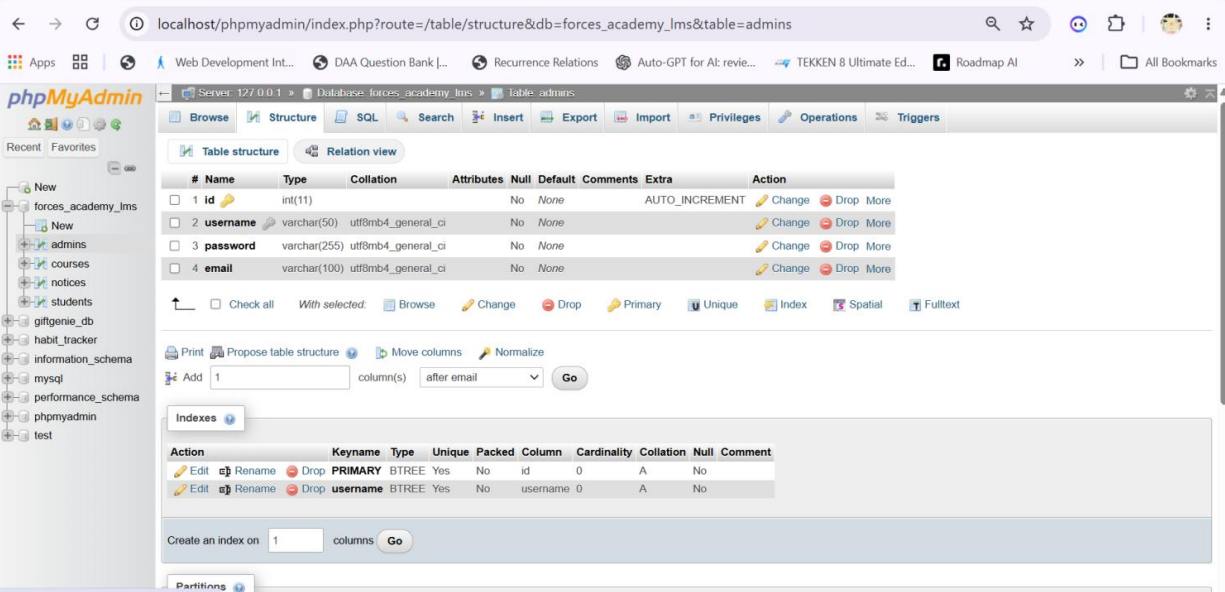

Indexes

Action	Keyname	Type	Unique	Packed	Column	Cardinality	Collation	Null	Comment
Edit Rename Drop	PRIMARY	BTREE	Yes	No	id	0	A	No	
Edit Rename Drop	email	BTREE	Yes	No	email	0	A	No	
Edit Rename Drop	roll_number	BTREE	Yes	No	roll_number	0	A	No	

Fig. 1.2 — students table schema

Admins Table

Holds administrator credentials for future admin-side portal access and course/notice management.

localhost/phpmyadmin/index.php?route=/table/structure&db=forces_academy_lms&table=admins

Server: 127.0.0.1 Database: forces_academy_lms Table: admins

Table structure

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	id	int(11)			No	None		AUTO_INCREMENT	Change Drop More
2	username	varchar(50)	utf8mb4_general_ci		No	None			Change Drop More
3	password	varchar(255)	utf8mb4_general_ci		No	None			Change Drop More
4	email	varchar(100)	utf8mb4_general_ci		No	None			Change Drop More

Indexes

Action	Keyname	Type	Unique	Packed	Column	Cardinality	Collation	Null	Comment
Edit Rename Drop	PRIMARY	BTREE	Yes	No	id	0	A	No	
Edit Rename Drop	username	BTREE	Yes	No	username	0	A	No	

Fig. 1.3 — admins table schema

Courses Table

Designed to store course listings that will be linked to student enrollments in later development phases.

localhost/phpmyadmin/index.php?route=/table/structure&db=forces_academy_lms&table=courses

Server: 127.0.0.1 Database: forces_academy_lms Table: courses

Table structure

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	id	int(11)			No	None		AUTO_INCREMENT	Change Drop More
2	course_name	varchar(100)	utf8mb4_general_ci		No	None			Change Drop More
3	description	text	utf8mb4_general_ci		No	None			Change Drop More
4	teacher_name	varchar(100)	utf8mb4_general_ci		No	None			Change Drop More
5	created_at	timestamp			No	current_timestamp()		ON UPDATE CURRENT_TIMESTAMP()	Change Drop More

Indexes

Action	Keyname	Type	Unique	Packed	Column	Cardinality	Collation	Null	Comment
Edit Rename Drop	PRIMARY	BTREE	Yes	No	id	0	A	No	

Create an index on 1 columns Go

Fig. 1.4 — courses table schema

Notices Table

Reserved for academy-wide announcements and notices to be displayed on the student dashboard.

localhost/phpmyadmin/index.php?route=/table/structure&db=forces_academy_lms&table=notices

Server: 127.0.0.1 Database: forces_academy_lms Table: notices

Table structure

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	id	int(11)			No	None		AUTO_INCREMENT	Change Drop More
2	title	varchar(200)	utf8mb4_general_ci		No	None			Change Drop More
3	content	text	utf8mb4_general_ci		No	None			Change Drop More
4	posted_by	varchar(100)	utf8mb4_general_ci		No	None			Change Drop More
5	created_at	timestamp			No	current_timestamp()			Change Drop More

Indexes

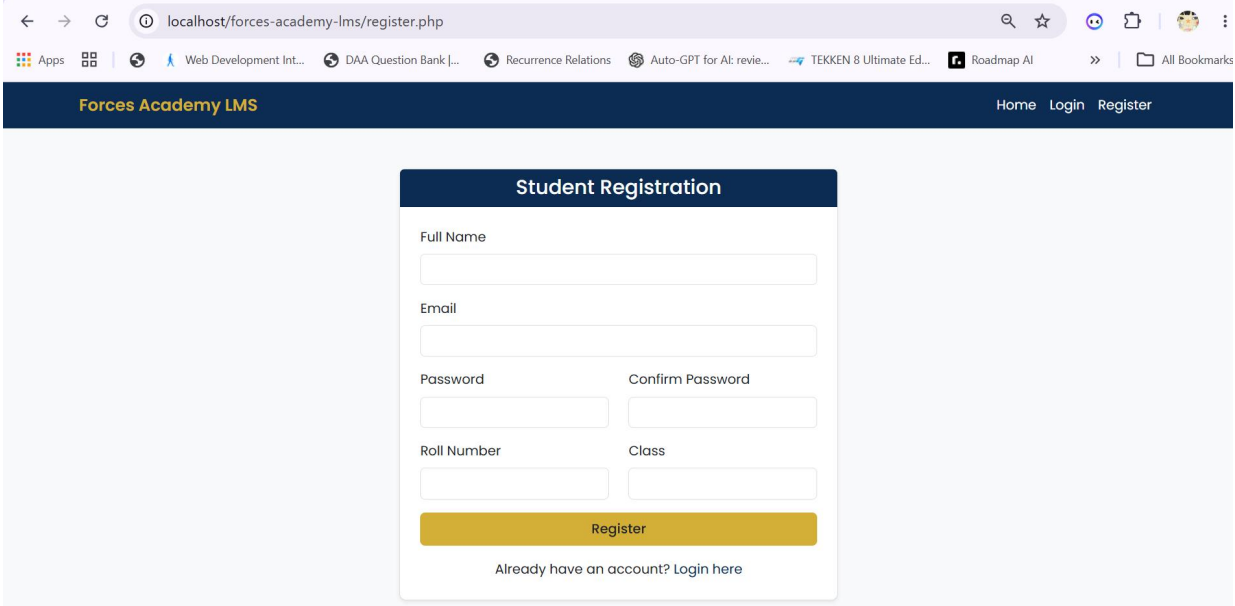

Action	Keyname	Type	Unique	Packed	Column	Cardinality	Collation	Null	Comment
Edit Rename Drop	PRIMARY	BTREE	Yes	No	id	0	A	No	

Create an index on 1 columns Go

02 STUDENT REGISTRATION

A registration interface was built at `register.php`, styled with the Forces Academy navy-and-brass theme. The form collects full name, email, password (with confirmation), roll number, and class, and submits securely to the backend using PHP prepared statements with `password_hash()` encryption.

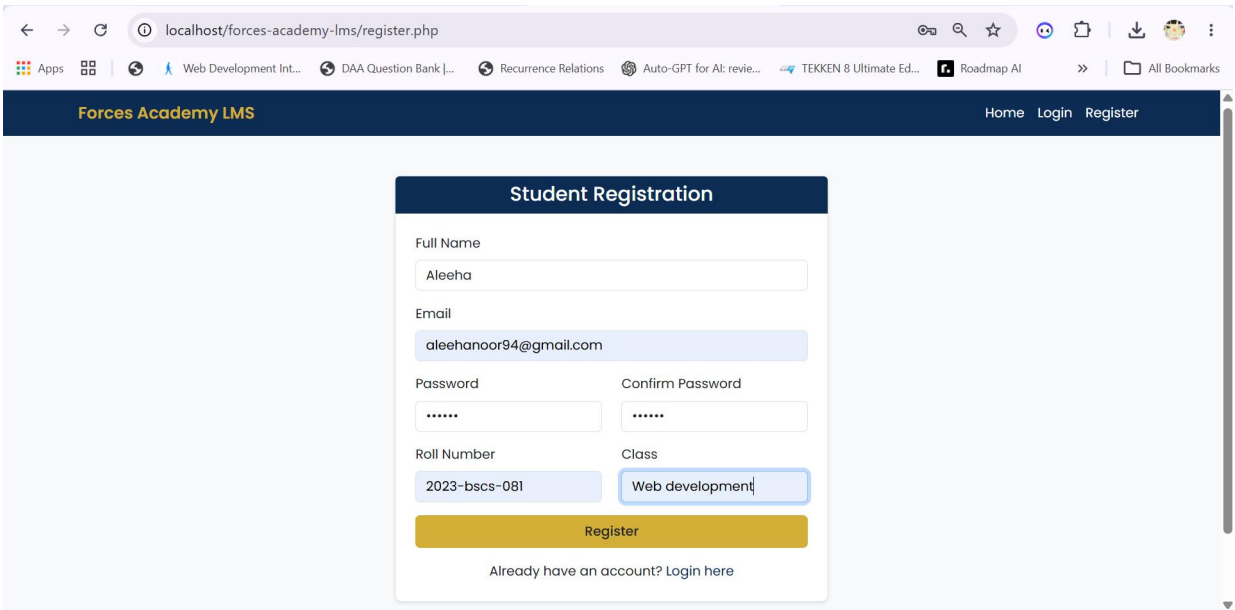

The screenshot shows a web browser window with the URL `localhost/forces-academy-lms/register.php`. The page has a dark blue header with the text "Forces Academy LMS" and navigation links "Home", "Login", and "Register". The main content area features a "Student Registration" form with the following fields: "Full Name", "Email", "Password", "Confirm Password", "Roll Number", and "Class". A yellow "Register" button is at the bottom of the form, and a link "Already have an account? Login here" is below it.

Fig. 2.1 — Student Registration form UI

Form Submission

Below, a sample student record is entered through the registration form and successfully validated and stored in the students table.

The screenshot shows the same "Student Registration" form, but with sample data entered: "Full Name" is "Aleeha", "Email" is "aleehanoor94@gmail.com", "Password" and "Confirm Password" are masked with "*****", "Roll Number" is "2023-bscs-081", and "Class" is "Web development". The yellow "Register" button and the "Already have an account? Login here" link are still visible.

Fig. 2.2 — Entering student registration details

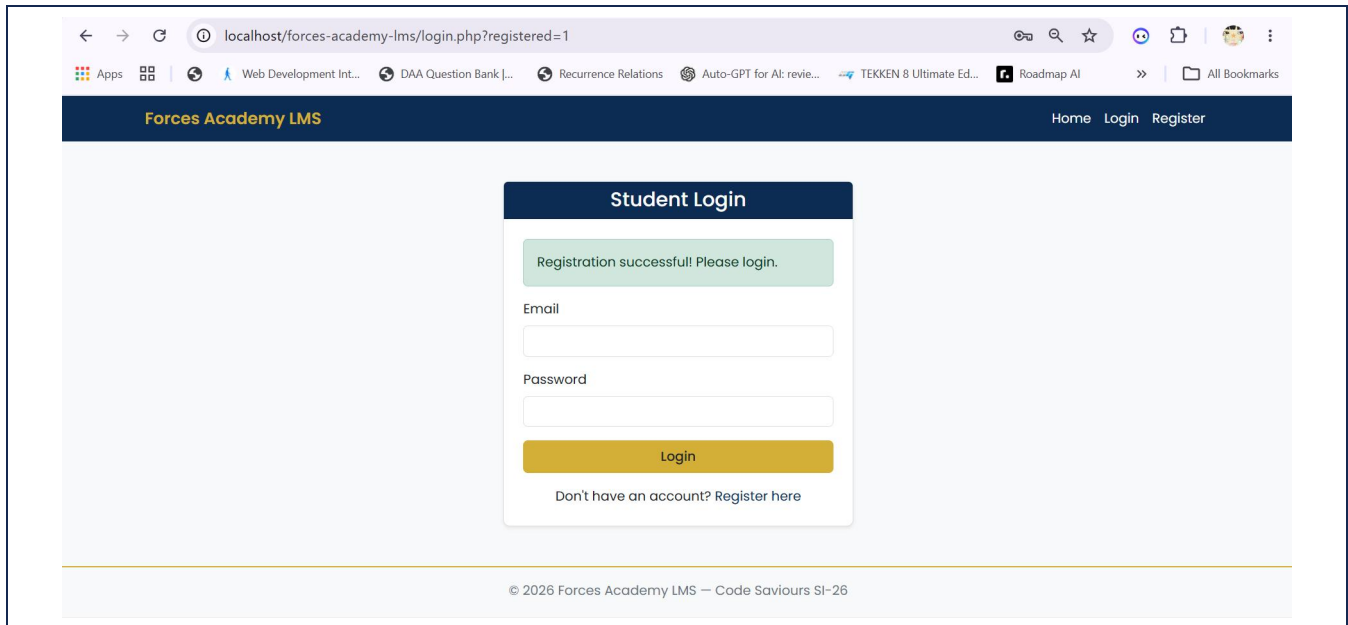

Fig. 2.3 — Registration confirmation after successful submission

03 LOGIN AUTHENTICATION

The login system at login.php authenticates registered students against the students table using `password_verify()` to compare hashed credentials, with PHP sessions used to maintain authenticated state across pages.

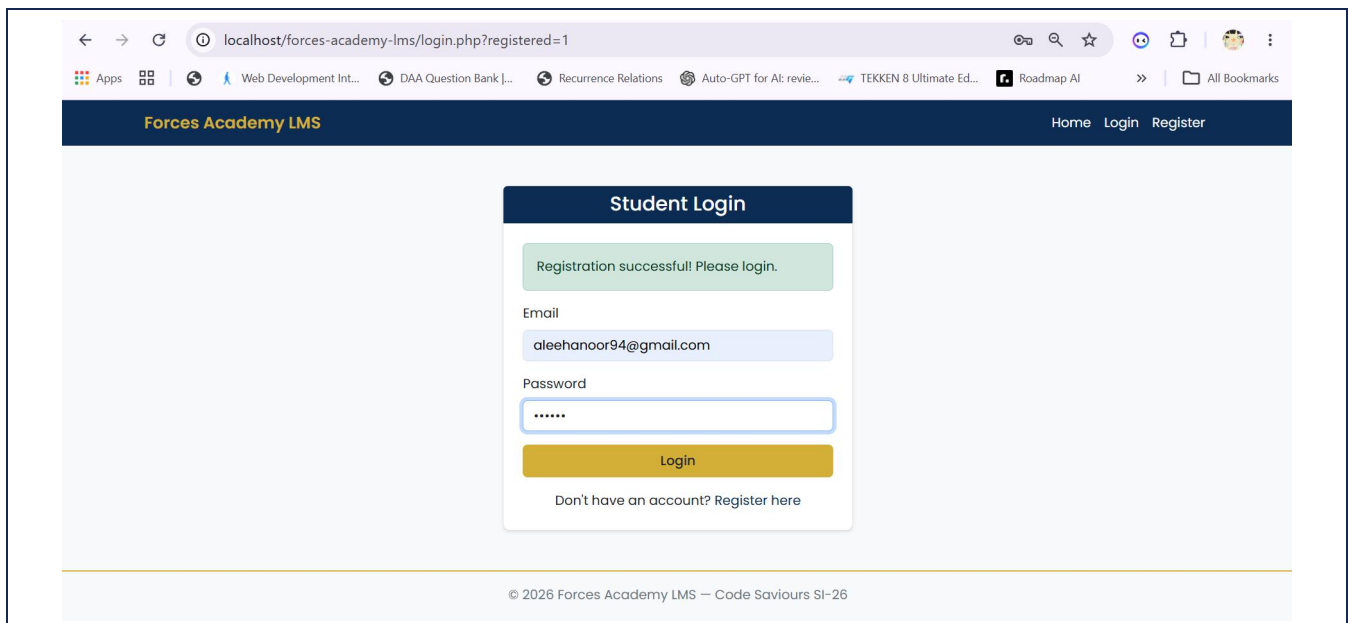

Fig. 3.1 — Student Login form UI

Successful Login

Upon successful authentication, the student is redirected to the protected dashboard, confirming that session handling and login validation are functioning correctly.

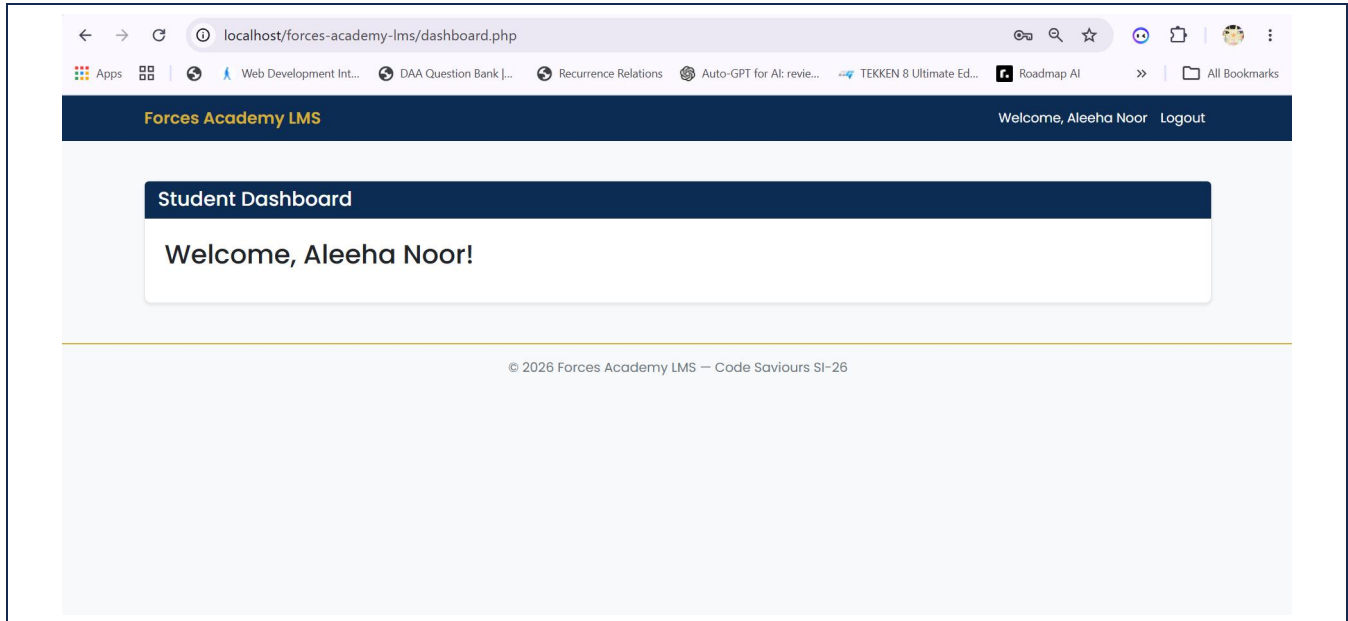

Fig. 3.2 — Dashboard access confirming successful login

04 WEEK 1 SUMMARY

- Designed and implemented the complete MySQL schema for the Forces Academy LMS.
- Built a secure student registration flow with password hashing and duplicate-email handling.
- Implemented login authentication with session-based access control and a protected dashboard.
- Applied the navy, brass, and parchment visual identity across the registration and login interfaces.
